Friends:

Just in doing my ramping up to speed after being out of the game for a month or so, I was just startled by this updated chart Jane pointed out to me. The math....well it works. If you study the charts, you can tell that I would think the high is either in, or FEBRUARY 14th will be the next critical day. Obviously, weather in SA will likely determine the outcome, but isn't it simply amazing how all that settles down into neat rhythms.

Interesting stuff, at least to me. As you might expect, my next step is to do the analysis on the SX12 and SX13 since they will be extremely easy to trade compared to the nearby.

Take care,
Ken
