

February 22, 2011

Friends:

I realize that I have bombarded you with information this weekend. There was a point to it. Just an amazing amount of things were coming together and I felt obligated to share them with you.

You will find attached to this email some simply flabbergasting charts. Make SPECIAL NOTE of the GOLD SYMMETRIC ACTION IN TIME. Wow. Also, the SUGAR leading indicator. And our FRIEND DOCTOR COPPER. For me it is amazing math, but it is also amazingly normal! All major highs have such amazing math if we can but find it.

OF COURSE, there could always be one more run to the upside, but this thing is getting long in the tooth. That run would be an even more important sell.

Probably more importantly the 60 YEAR CYCLE has clobbered the markets, exactly like it did in the bonds a few months ago.

After such a bull run, there of course will be wild rallies back after an initial decline. It is important to remember that the highs for the year have likely been printed, but that new crop contracts probably test them sometime in either April or June.

Hope this information has been helpful.

Ken
