

January 10, 2011

Friends:

Today has presented a very interesting opportunity to hedge energy equivalents in NAT GAS. I have attached the weekly and monthly charts, plus the daily chart with entry and exit stops for your review.

Remember NAT GAS does not always follow the other energies, but it is very cheap versus all other commodities and it offers a VERY low risk of entry.

Also, I have been watching NAT GAS for months now, waiting for a setup. This is a good one. Even if it fails, it was worth a shot in our view. We will do 5 contracts as we have a lot of energy in terms of N, P, K etc to hedge.

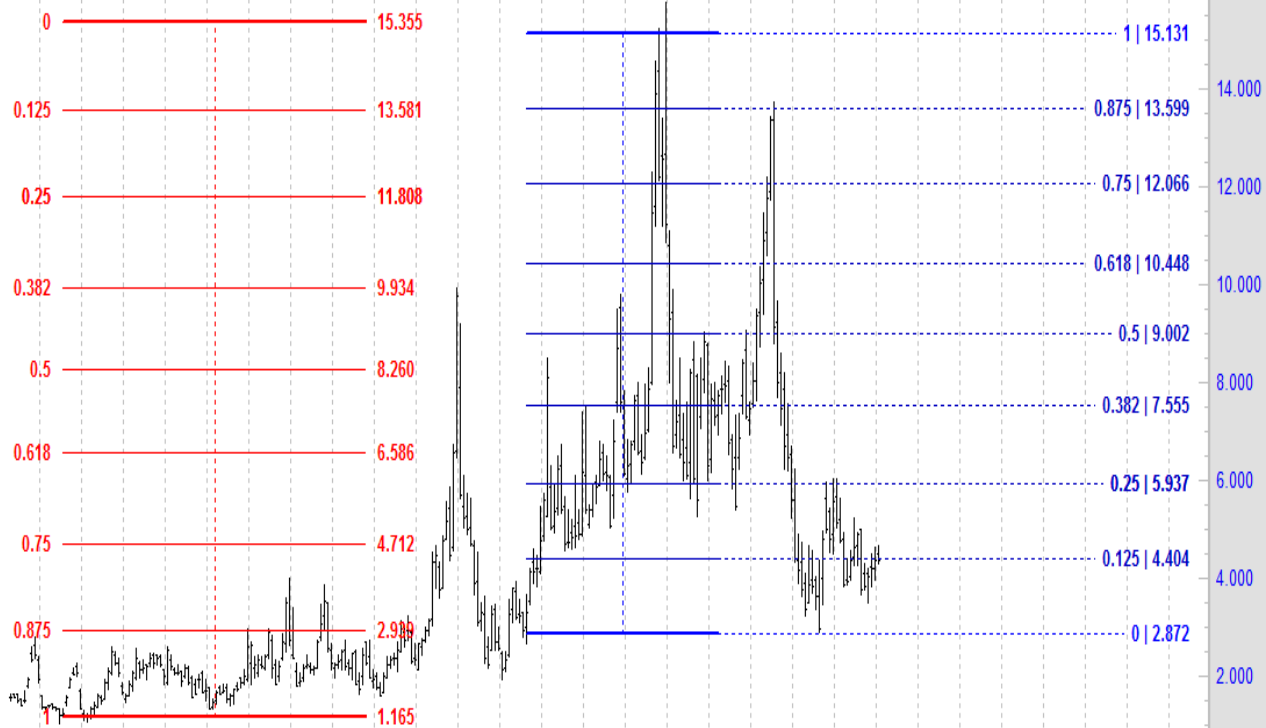

Take care,
Ken
